## WORK EXPERIENCE

---

### GirlsScript Summer of Code (GSSoC)

May 2023 – Aug 2023

Open Source Contributor

Remote

- **Web Game Contributions:** Added vanilla JS games to GameZone and other repositories.
- **Git Collaboration:** Gained version control and collaboration experience in team projects using Git.
- **Community Involvement:** Developed teamwork and communication skills through active participation in discussions and assisting contributors.

## EDUCATION

---

### University Institute of Engineering & Technology (UIET) Panjab University

2022-Present

B.E., Information Technology (8.25 CGPA)

Chandigarh

## PROJECTS

---

### URL Shortener (Express.js, Node.js, Bootstrap, MongoDB)

[GitHub](#)

- Developed a URL Shortener using Express.js and Node.js for the backend, Bootstrap for the frontend, and MongoDB for data storage.
- Implemented unique features such as link shortening and automatic QR code generation.
- Provided user-friendly options for copying, sharing, and deleting URLs.

### Notes API (Express.js, Node.js, Jest)

[GitHub](#)

- Developed a robust API where a user can perform CRUD operations on Notes.
- Used Jest framework for unit testing the API and implemented error handling for edge cases.

### LetMeCook - Recipe Recommendation Website (Python Flask, Edamam API)

[GitHub](#)

- Developed a recipe recommendation website using Python Flask, JavaScript and the Edamam API.
- Implemented personalized recipe suggestions based on user-input ingredients.

### Food Delivery App (Flutter, Firebase)

[GitHub](#)

- Developed a user-friendly food delivery mobile app using Flutter and Firebase.
- Integrated Firebase for user authentication using login system and real-time cart page.

### News App (Flutter)

[GitHub](#)

- Developed a Flutter app for staying up-to-date with the latest global news.
- Implemented features to explore top headlines, search for articles, search for location based news.
- Built a responsive UI for a seamless news browsing experience.
